

An Agent That Builds Agents

Your twin tailored to your day-to-day — in 10 minutes, just by talking

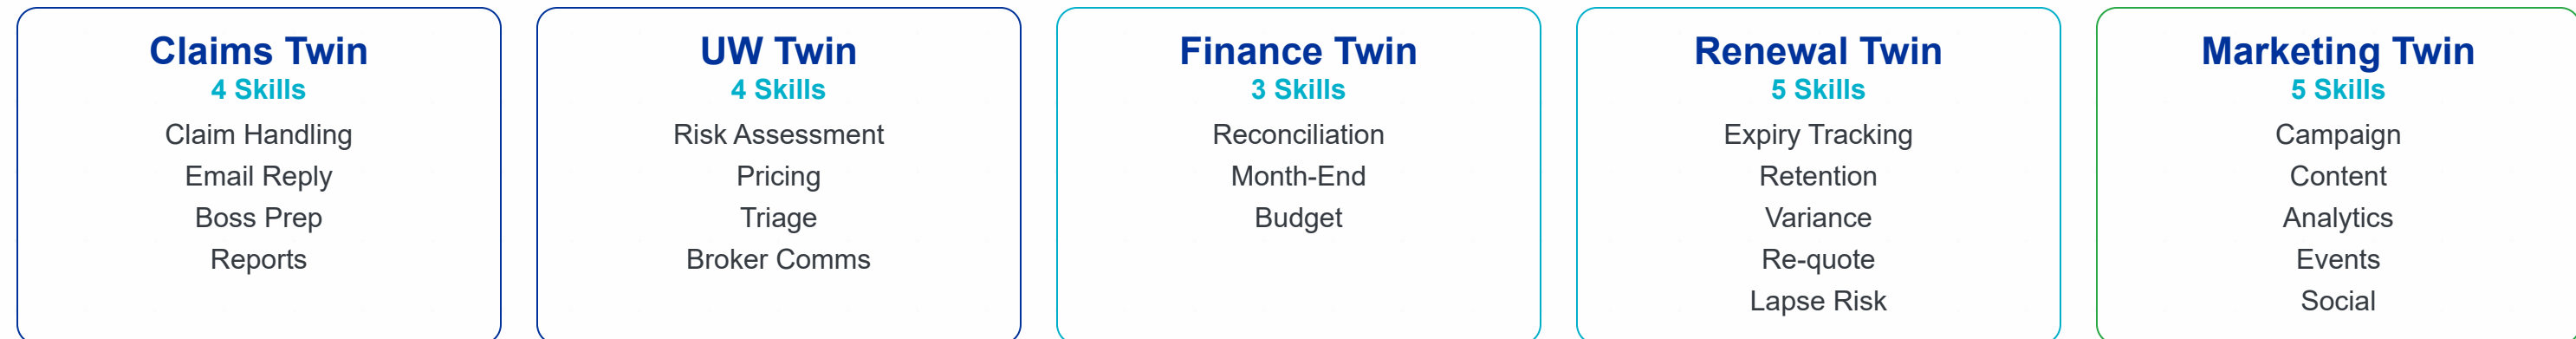

What if 55,000 staff globally each had their own twin — triple productivity.

Your Twin Is Not My Twin

Same Factory — completely different output for every role

SAME FACTORY — 11 Agents, no coding, just talk

↓ Creates ANY Digital Twin ↓

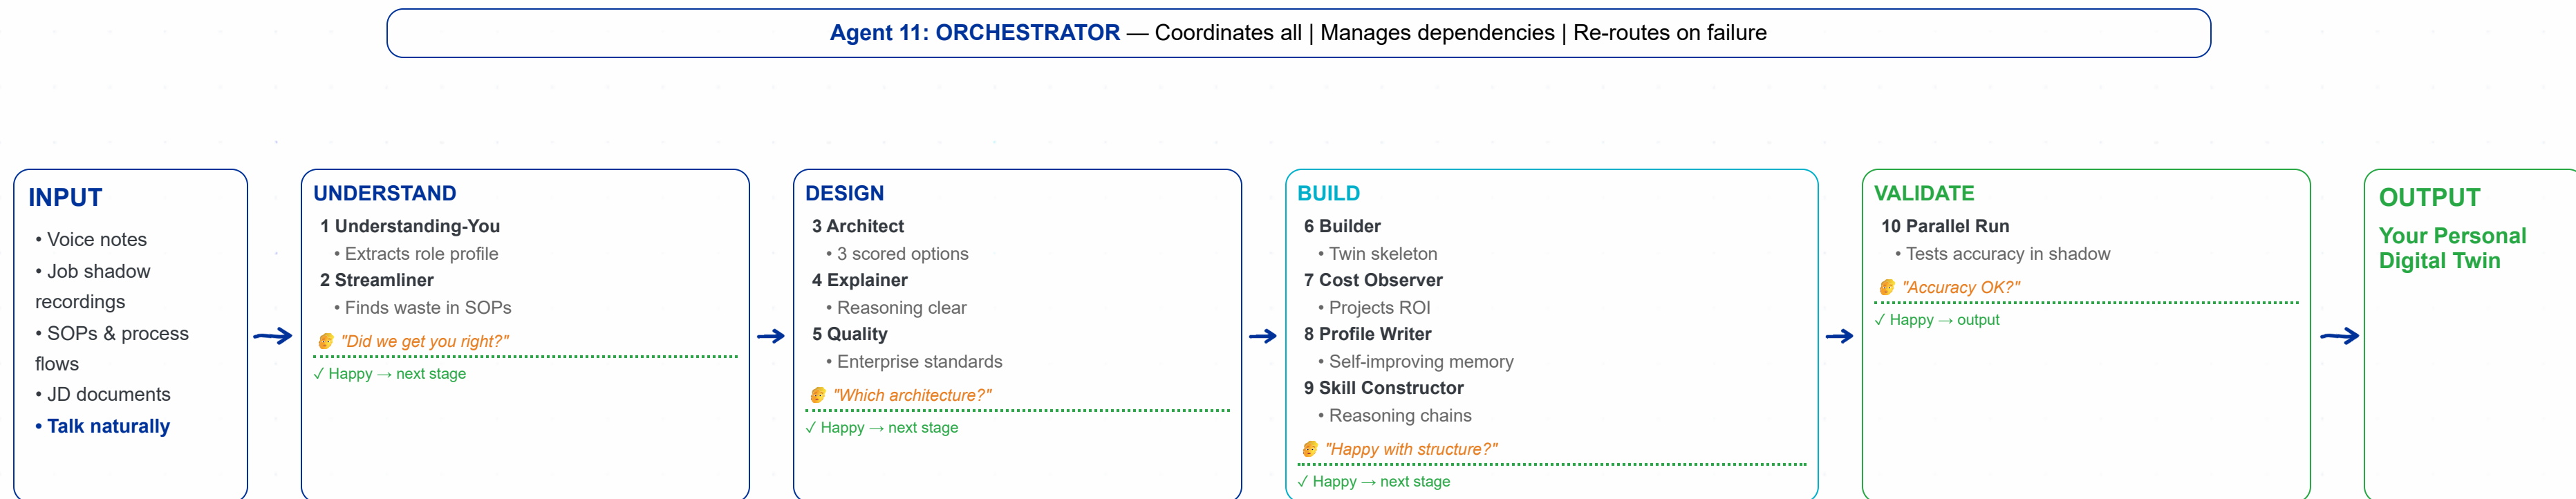

+ Acquisition, CS, HR, Operations...

Same factory input — completely different twin output — tailored to THEIR day-to-day

Digital Twin Factory — Process Map

11 Agents in 4 Phases — Orchestrator coordinates — Human validates every phase

Sequential Steps

Autonomous Agents (Claude Sonnet 4)

Human Gate Every Phase

Iterative Self-Improving

Orchestration: Claude Code CLI

Not happy? Loop back — never proceeds without your OK

Your Daily Twin — 4 Skills Workflow

Each skill is a governed agentic workflow with human approval

YOUR DIGITAL TWIN AGENT — ORCHESTRATOR
Coordinates all 4 skills | Manages cross-skill triggers

↓ orchestrate

	TRIGGER	AGENTIC TASK	HUMAN-IN-THE-LOOP	OUTPUT
S1	New case arrives	• Read case • Check policy • Calculate settlement • Draft letter	MS Teams: Approve / Edit / Reject	Decision sent, letter delivered
S2	New email inbox	• Identify sender • Determine priority • Draft reply in your style	Review draft: Approve / Edit	Reply sent, matching your tone
S3	Cron: Day 3 + Day 7	• Pull KPIs • Compare trends • Flag anomalies	Review report: Approve / Edit scope	Report distributed
S4	Cron: Thursday 7am	• Analyze 12 weeks • Pick top 3 talking points • Structure brief	Review brief: Approve / Add topic	EXCO briefing ready

LLM: Claude Haiku 4 (cost-optimised) | Orchestration: n8n (free, self-hosted) | Human controls send via MS Teams | Auditable trail

Governed Agentic Workflow — you stay in control
